Intended Audience & Scope of Practice

This CME/CNE activity is intended for primary care physicians, physician assistants, nurses, and other health care specialists dealing with infectious diseases.

Elements of Competence

This CME/CNE activity has been designed to change learner competence and focuses on the American Board of Medical Specialties areas of patient care and procedural skills, and medical knowledge.

Practice Gaps, Needs and Objectives

The overall objective of this activity is to prevent, accurately diagnose and optimally treat infectious diseases.

Specific learning objectives, based on documented gaps in practice, supported through regional and national data, will address clinical problems related to:

- Skin and soft tissue infections
- Sexually transmitted diseases
- Infectious disease acquired in a community or health care setting
- Midwest vector borne diseases
- Antimicrobial efficacy, safety, and stewardship
- New diagnostic modalities for infectious diseases
- Immunization
- Travel-related infection issues
- Clostridium difficile disease

Participants will also learn about new antimicrobials and other therapeutics, updated practice guidelines, and strategies for prevention including the latest recommendations for vaccines. Case-based discussions will allow participants to identify ways to incorporate learning into their daily practice.
