POLICY ON FACULTY AND SPONSOR DISCLOSURE
It is the policy of the University of Wisconsin School of Medicine and Public Health and School of Nursing that the faculty, authors, planners, and other persons who may influence content of this CME/CNE activity disclose all relevant financial relationships with commercial interests in order to allow CME/CNE staff to identify and resolve any potential conflicts of interest. Faculty must also disclose any planned discussion of unlabeled/unapproved uses of drugs or devices during their presentation(s). Detailed disclosures will be made in the activity handout materials.
TARGET AUDIENCE AND SCOPE OF PRACTICE
This CME/CNE activity is designed to meet the needs of practicing internists, family physicians, physician assistants, advanced practice nurses and other health professionals interested in expanding their knowledge and improving their care of patients with complex medical illness.

ELEMENTS OF COMPETENCE
This CME/CNE activity has been designed to change learner competence and focuses on the American Board of Medical Specialties areas of medical knowledge, and patient care and procedural skills.

ACTIVITY OBJECTIVES
This activity enhances participants’ knowledge, skills, attitudes and behaviors, with a focus on recent advances in preventive care, acute and chronic disease management, and enhancement of practitioner application of national priorities in health systems improvement. Topics and speakers were carefully considered to be sure that we addressed current challenges for health care issues routinely encountered by primary care providers and their health professional teams. The overall objective of this activity is to provide a comprehensive review of the most important advances in internal medicine and its subspecialties essential for all medical professionals who care for adults in the following areas:

General Internal Medicine and relevant topics in:
- Allergy, Pulmonary and Critical Care Medicine
- Cardiovascular Medicine
- Endocrinology, Diabetes and Metabolism
- Gastroenterology and Hepatology
- Geriatrics and Gerontology
- Hematology and Medical Oncology
- Infectious Disease
- Nephrology
- Rheumatology
